I have a 135 Verado on a Montauk 190. The 135 was replaced by the 150. The only change is to the ECU. I am a big fan of these engines. Good batteries are essential for Verados with electric power steering but less critical for the four cylinder 150 Verado, which almost always uses hydraulic steering.

My owner's manual states the starting process I described above is required when you have a new motor or the battery has been disconnected. I wonder how many hours you have to have on the motor before the computer decides that it's not new anymore.

Agreed. Forum member Gep has a 130 HP Yamaha 2-stroke on his 18 and I cruised with him for more than 600 miles two summers ago. The boat performed very well and got great mileage. Sure, I walked away from him in WOT runs, but how often are you running that fast?

Jordon, Thanks for the details. I agree. Vent holes play a big role in improving planing performance of both 2-stroke and 4-stroke outboards. The original Bravo I FS, from February 2012 to August 2013, did not come with Mercury's patented PVS (Performance Vent System). We listened to our customers and enhanced the FS with PVS.
