The brain is an organ that serves as the center of the nervous system in all vertebrate and most invertebrate animals. The brain is located in the head, usually close to the sensory organs for senses such as vision. The brain is the most complex organ in a vertebrate's body. In a human, the cerebral cortex contains approximately 14–16 billion neurons, and the estimated number of neurons in ...

The previous chapter describes seven principles that support learning with understanding. This chapter explores the implications of those principles for the intentional and systemic design of four key elements of the educational system—curriculum, instruction, assessment, and professional development—to promote learning with understanding within the context of advanced study.

7. Designing Curriculum, Instruction, Assessment, and ...

I try hard to avoid the 'hidden gem' golfing cliché. For starters, there will be countless golfers that are already well aware of the delights on offer at Piltdown Golf Club in East Sussex, and, no doubt, the lovely courses at nearby Crowborough Beacon and Royal Ashdown Forest that make up this glorious triumvirate of heathland classics. I will concede that there are better known courses ...
