Microsoft Access and Microsoft Excel possess many similarities, which can make it difficult to decide which program you should use. For example, both programs can store large amounts of data, run powerful queries and analysis tools to slice and dice that data, and perform sophisticated calculations that return the data that you need.

Using Access or Excel to manage your data - Office Support

Microsoft Office 2008 for Mac is a version of the Microsoft Office productivity suite for Mac OS X. It supersedes Office 2004 for Mac (which did not have Intel native code) and is the Mac OS X equivalent of Office 2007. Office 2008 was developed by Microsoft's Macintosh Business Unit and released on January 15, 2008. Office 2008 was followed by Microsoft Office for Mac 2011 released on October ...
